Deprivation

New national and local deprivation data – *English Indices of Deprivation 2010 (IMD 2010)* – has recently been published.

The Index of Multiple Deprivation (IMD)¹ measures the level of deprivation in each “lower super output area” (LSOA) in England and ranks each LSOA according to how deprived it is compared to the others – with 1 being the highest (most deprived) and 32,482 being the least deprived in the country.

The maps on the following pages show the overall deprivation across Islington, together with maps for income deprivation (older people and children) to give an indication of older people and child poverty across the borough.

There are 7 or 8 LSOAs in each ward in Islington (118 overall). The following ward data is based on aggregating the LSOA data. This is not ‘official’ IMD data and is therefore described as “provisional” data.

- Overall Islington’s deprivation ‘score’ of 35.87 was the **14th highest deprivation score in England** and **5th highest in London**.
- This is an improvement on the position 3 years ago (IMD 2007) when Islington ranked 8th most deprived nationally and 4th most deprived in London.
- Caledonian** ward has a provisional deprivation score of **39.14** which makes it the **4th** most deprived ward in the borough.

Table 1: Provisional IMD scores for Islington wards

Ward	Provisional ward score	Deprivation ranking in Islington	Score of most deprived LSOA in ward	Score of least deprived LSOA in ward
Finsbury Park	43.07	1	58.80	22.41
Canonbury	39.42	2	58.06	27.00
Holloway	39.42	3	44.73	32.89
Caledonian	39.14	4	59.11	22.24
Tollington	39.05	5	47.42	29.06
Mildmay	39.04	6	55.30	31.51
Junction	37.49	7	51.12	25.22
Hillrise	36.88	8	55.10	28.25
St George's	36.00	9	47.67	24.44
St Mary's	34.51	10	41.01	22.35
St Peter's	33.98	11	50.04	21.28
Highbury West	33.11	12	51.97	21.93
Barnsbury	31.01	13	53.13	19.06
Bunhill	29.95	14	38.18	15.43
Clerkenwell	29.91	15	42.07	15.21
Highbury East	29.50	16	44.47	19.07

¹ For more information on the 2010 IMD visit www.communities.gov.uk/publications/corporate/statistics/indices2010

The provisional deprivation score for **Caledonian** increased by **1.6 points** since the previous (2007) IMD was published. This means that Caledonian ward is **more deprived** compared to 3 years ago whereas all other wards in Islington have shown an improvement (average improvement across Islington is around three points). See Table 2.

Table 2: Relative changes since IMD 2007

Ward	Provisional ward score IMD 2010	Provisional ward score IMD 2007	Change in ward score (2007-10)
Barnsbury	31.01	35.54	-4.5
Bunhill	29.95	35.83	-5.9
Caledonian	39.14	37.52	1.6
Canonbury	39.42	41.88	-2.5
Clerkenwell	29.91	32.98	-3.1
Finsbury Park	43.07	47.70	-4.6
Highbury East	29.50	33.02	-3.5
Highbury West	33.11	34.27	-1.2
Hillrise	36.88	40.26	-3.4
Holloway	39.42	44.51	-5.1
Junction	37.49	39.33	-1.8
Mildmay	39.04	43.02	-4.0
St George's	36.00	37.72	-1.7
St Mary's	34.51	35.67	-1.2
St Peter's	33.98	37.93	-4.0
Tollington	39.05	43.90	-4.9

Domains of deprivation

The IMD 2010 is comprised of seven different domains (or sub-measures) of deprivation. The following table shows the relative rankings of the Islington wards for each of the seven domains (where 1 is most deprived and 16 is least deprived in Islington).

Table 3: Ranking of domains of deprivation by Islington wards

Ward	Income	Employm't	Crime	Health	Housing/ access to services	Education and training	Living Env't
Barnsbury	13	15	12	16	9	7	13
Bunhill	14	16	16	1	4	4	9
Caledonian	4	6	4	8	10	1	15
Canonbury	2	4	2	9	13	9	7
Clerkenwell	15	13	15	15	5	13	2
Finsbury Park	1	1	1	4	2	6	8
Highbury East	16	13	13	13	16	16	5
Highbury West	12	10	14	12	11	15	6

St George's	9	9	6	5	3	14	11
St Mary's	10	11	8	11	15	3	3
St Peter's	11	12	10	14	12	2	14
Tollington	5	2	9	2	6	11	10

Indices of Deprivation 2010

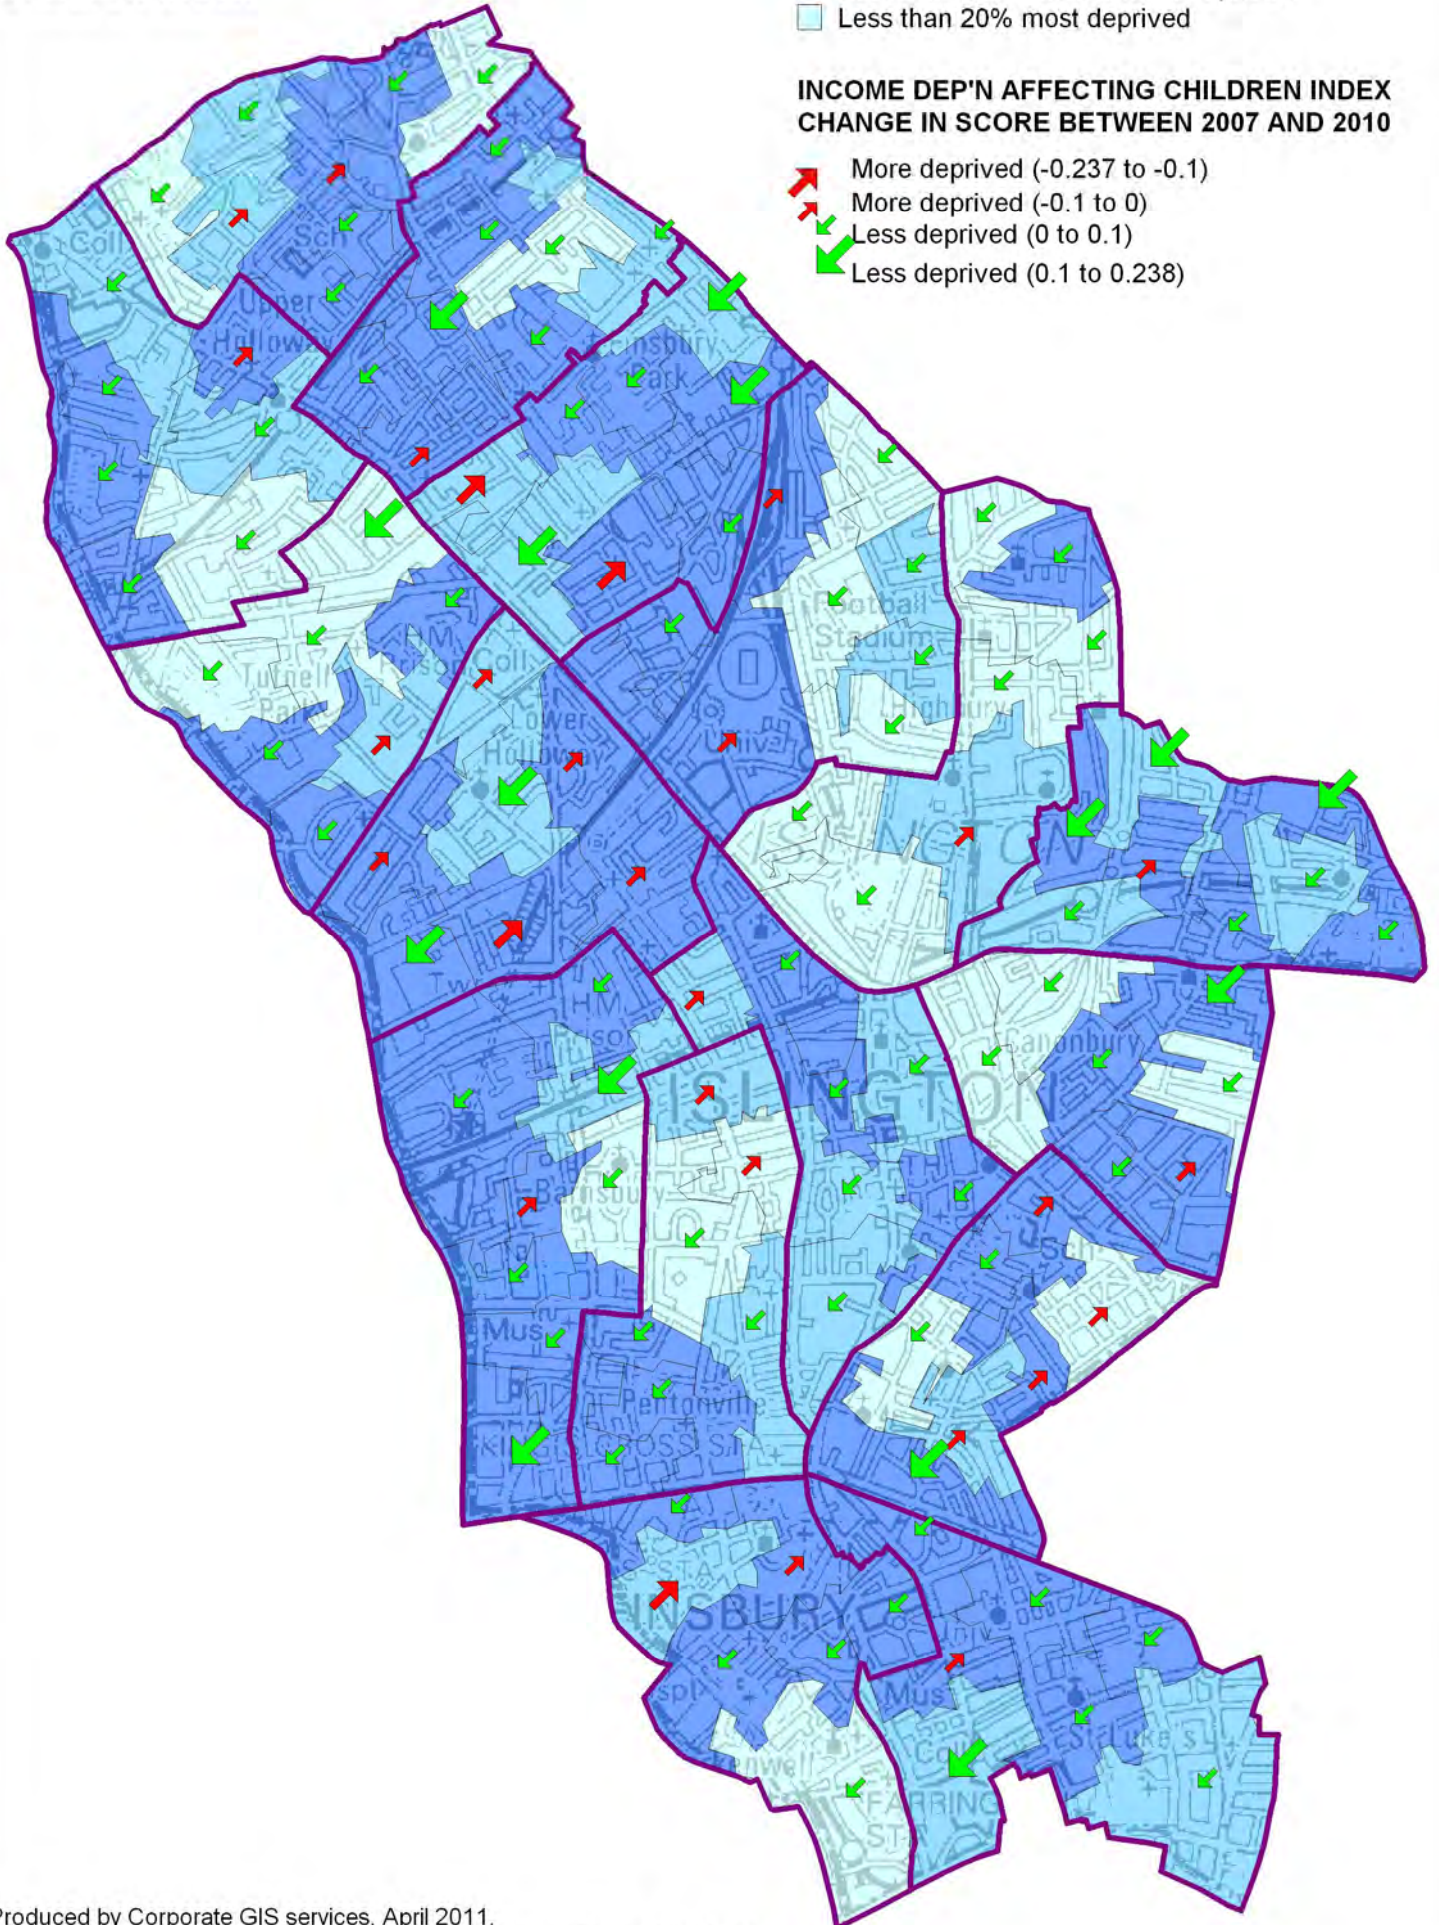

Income Deprivation Affecting Children Index

INCOME DEP'N AFFECTING CHILDREN INDEX NATIONAL SCORE

- 10% most deprived
- Between 10% and 20% most deprived
- Less than 20% most deprived

INCOME DEP'N AFFECTING CHILDREN INDEX CHANGE IN SCORE BETWEEN 2007 AND 2010

- More deprived (-0.237 to -0.1)
- More deprived (-0.1 to 0)
- Less deprived (0 to 0.1)
- Less deprived (0.1 to 0.238)

Children and Young People

This section provides a selection of information about children and young people resident in Islington – covering:

- Ethnicity and proportion of pupils with English as an additional language
- Child poverty – families on benefits, children eligible for free school meals
- Learning & attainment - Early Years (gap), Key Stage 2, GCSEs, Level 2 by age 19

The information is taken from the Area Children & Young People’s Profile 2010 which provides a comprehensive analysis of information about children and young people in Islington.

The information is broken by the six Children and Young People’s Partnership areas as follows:

Hornsey – Finsbury, Park, Hillrise and Tollington wards

Holloway – Holloway, Junction and St George’s wards

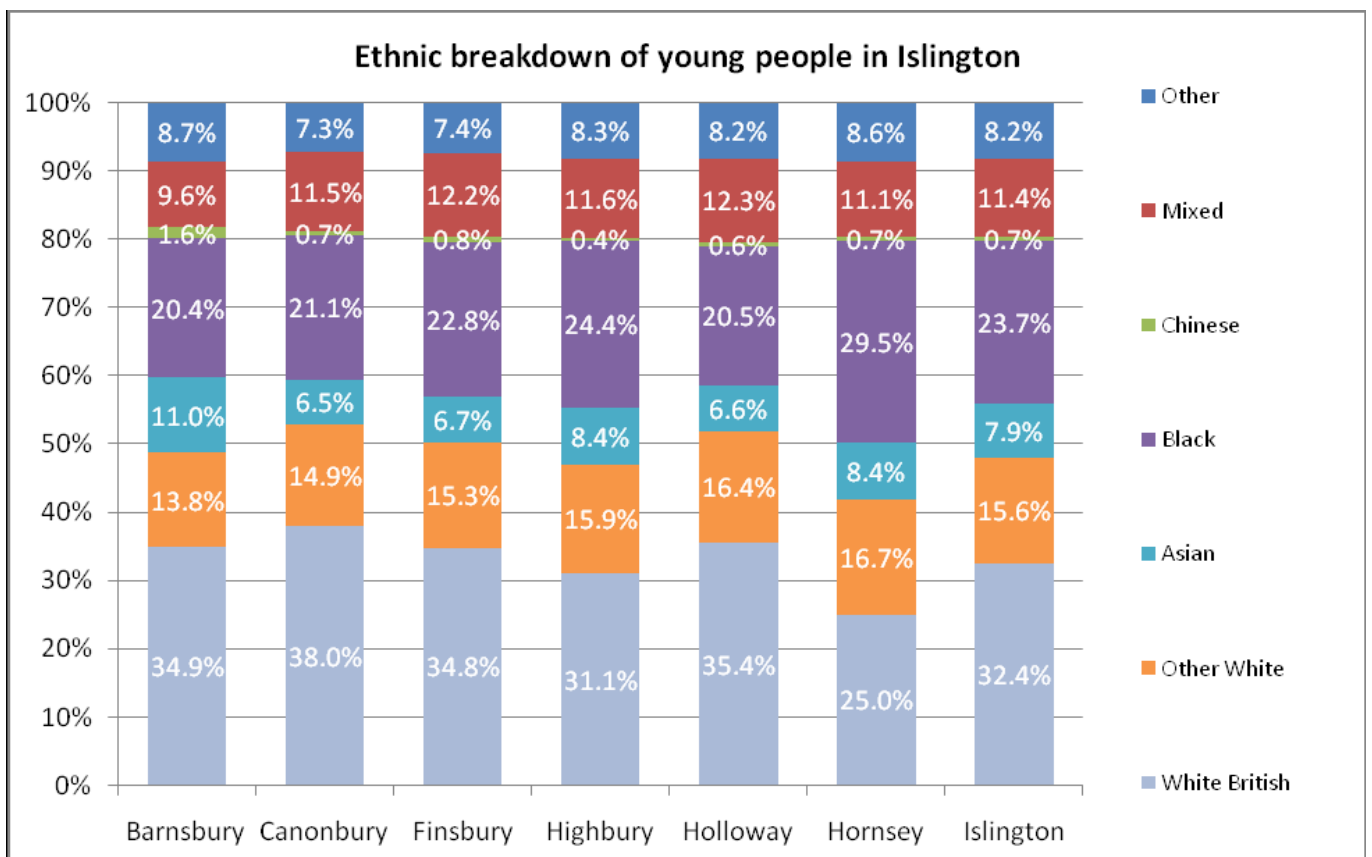

Highbury – Highbury East, Highbury West, and Mildmay wards

Barnsbury – Barnsbury and Caledonian wards

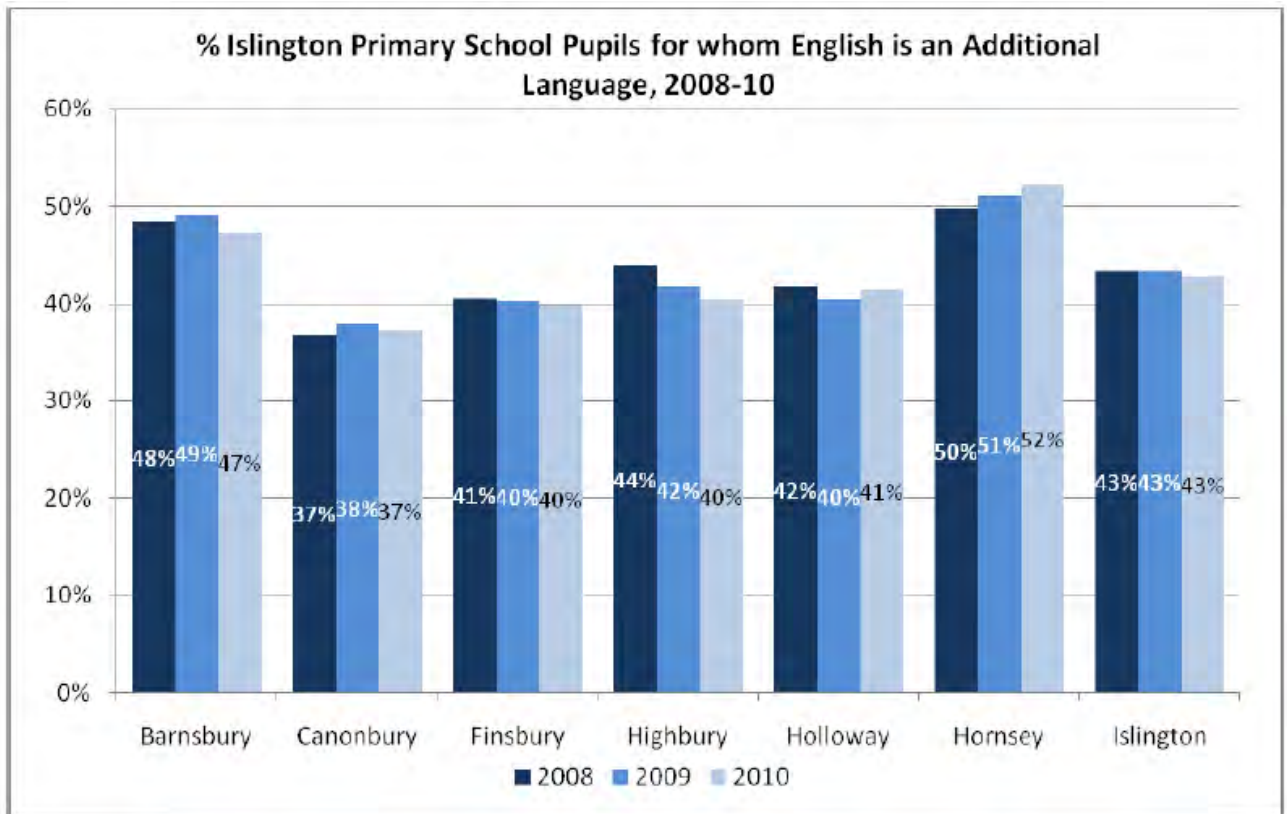

Canonbury – Canonbury, St Mary’s and St Peter’s wards

Finsbury – Bunhill and Clerkenwell wards.

Ethnicity

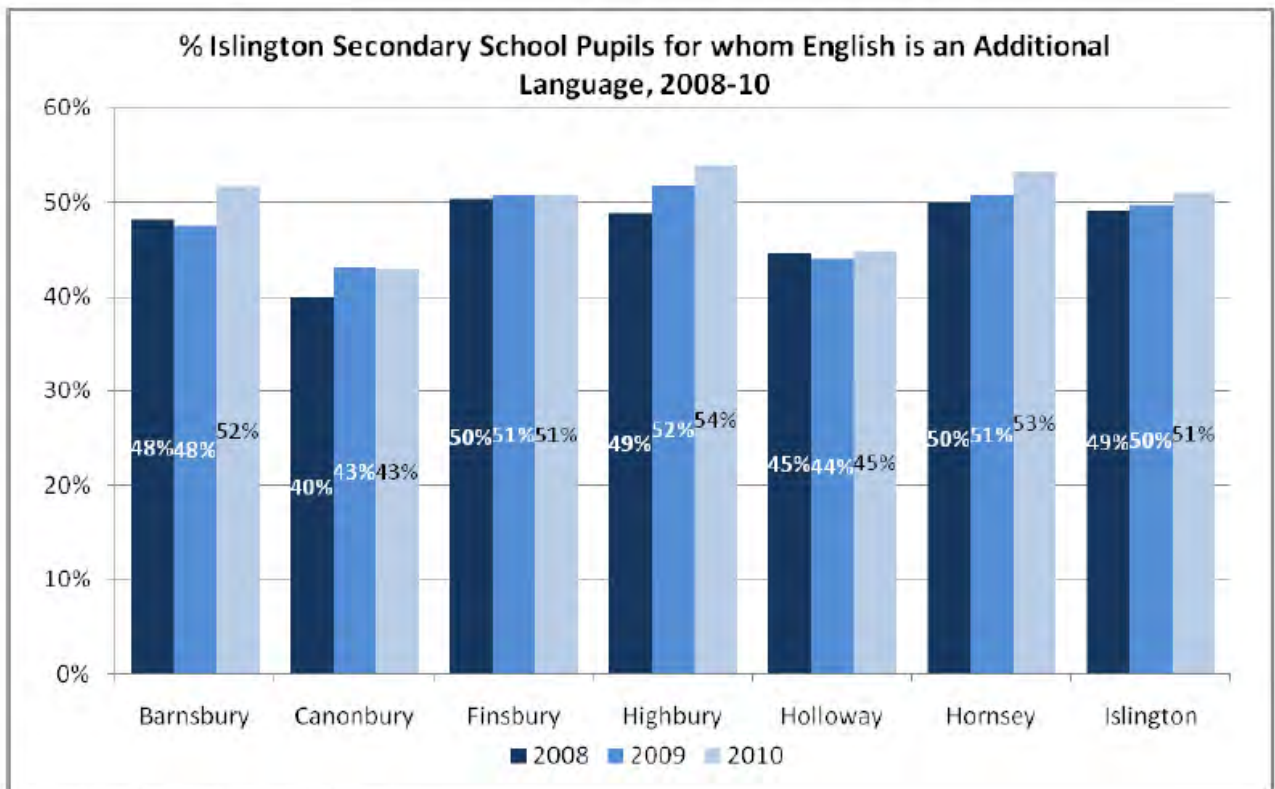

Children with English as an Additional Language (EAL)

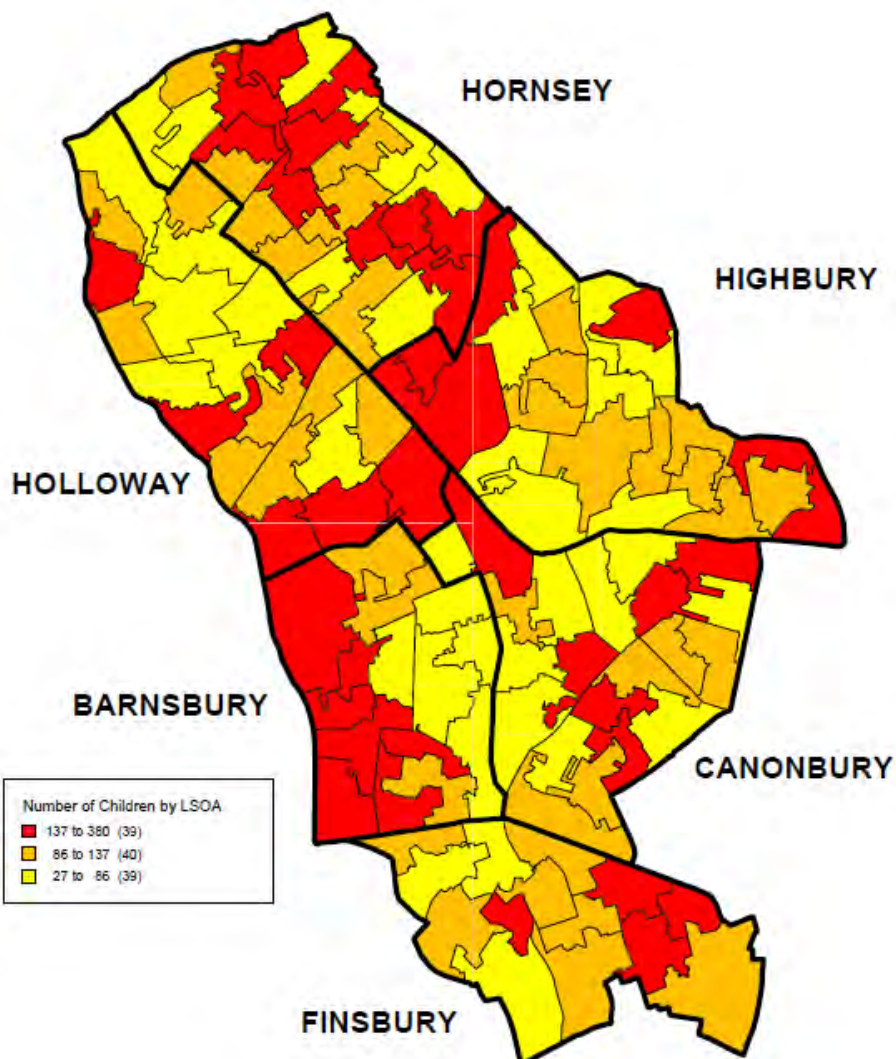

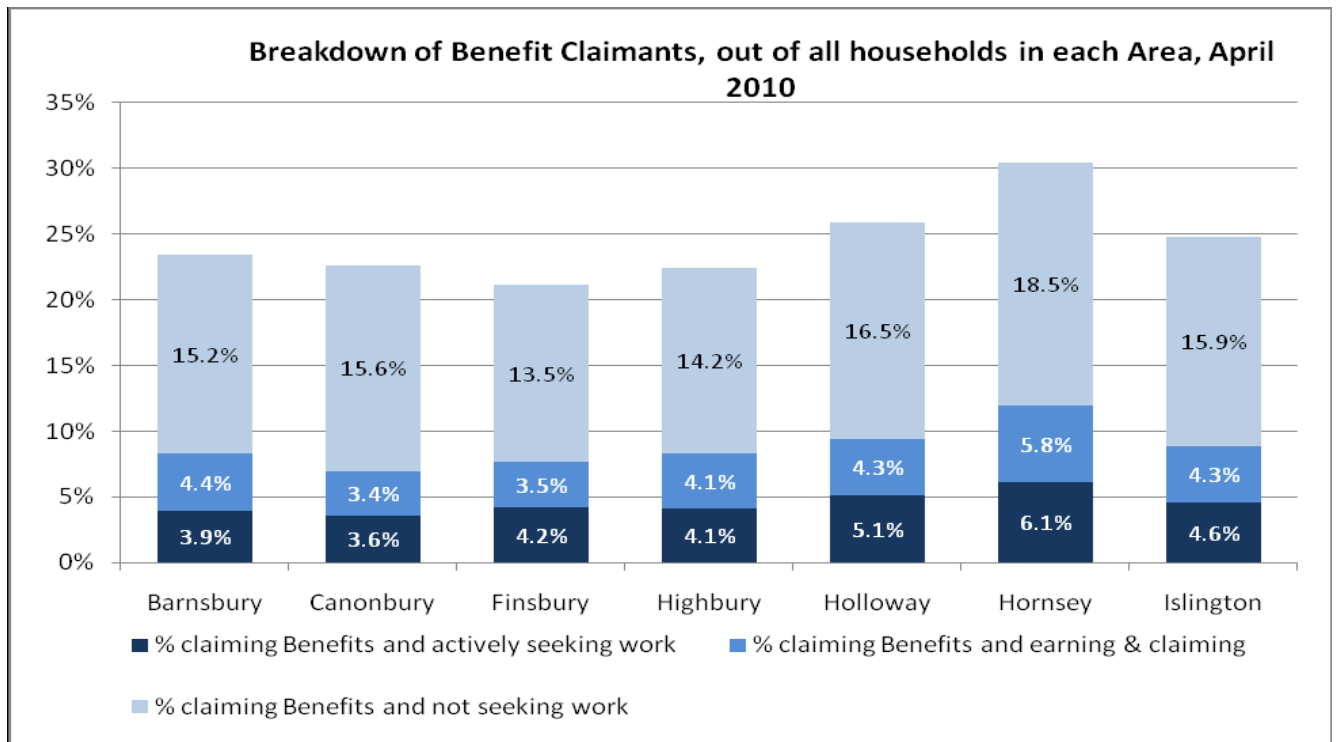

Source: School Census, January 2008-10

A higher proportion of secondary school pupils resident in Islington have English as an additional language, compared to primary school pupils.

Learning & Attainment

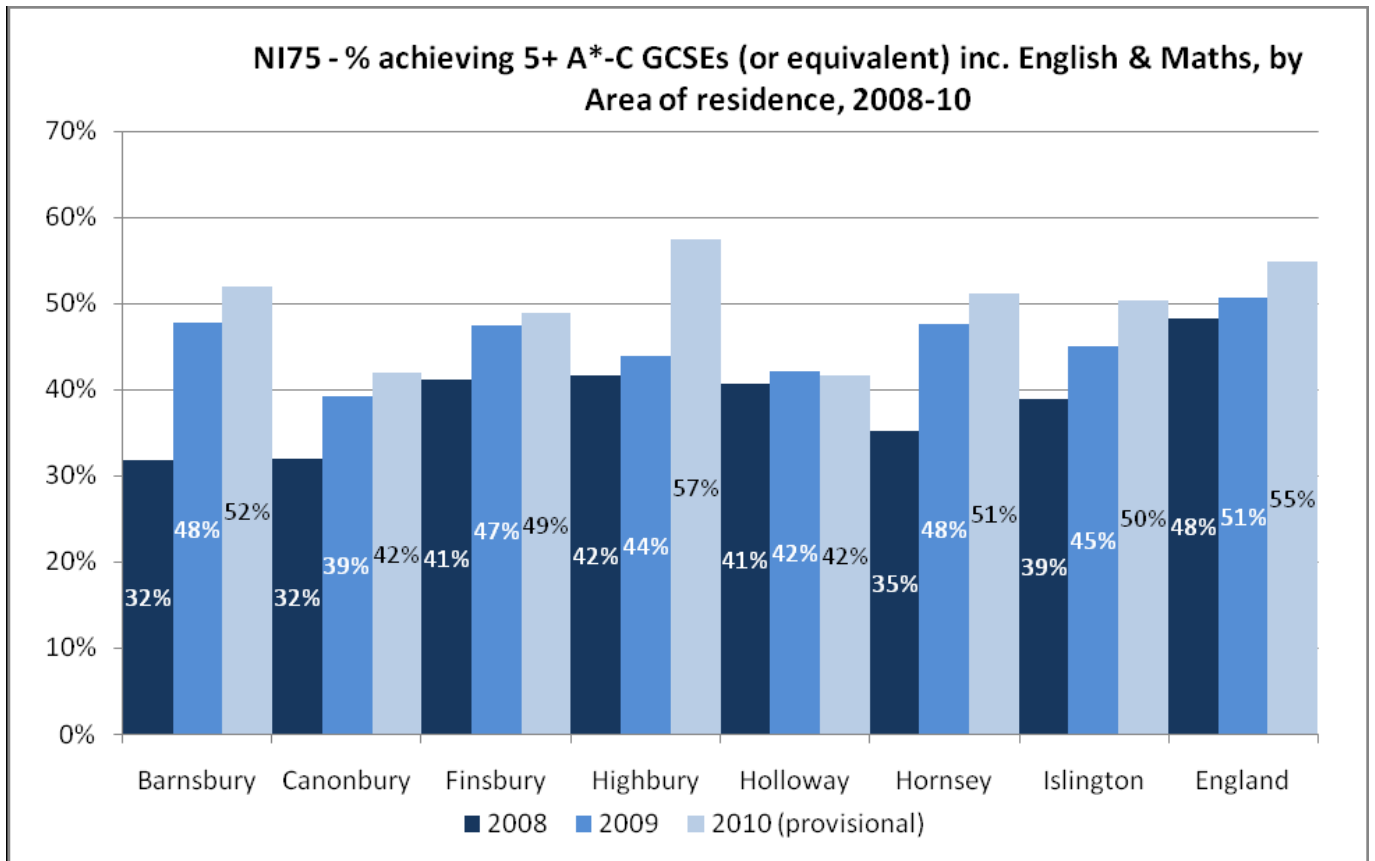

Early Years (narrowing the gap)

Key Stage 2

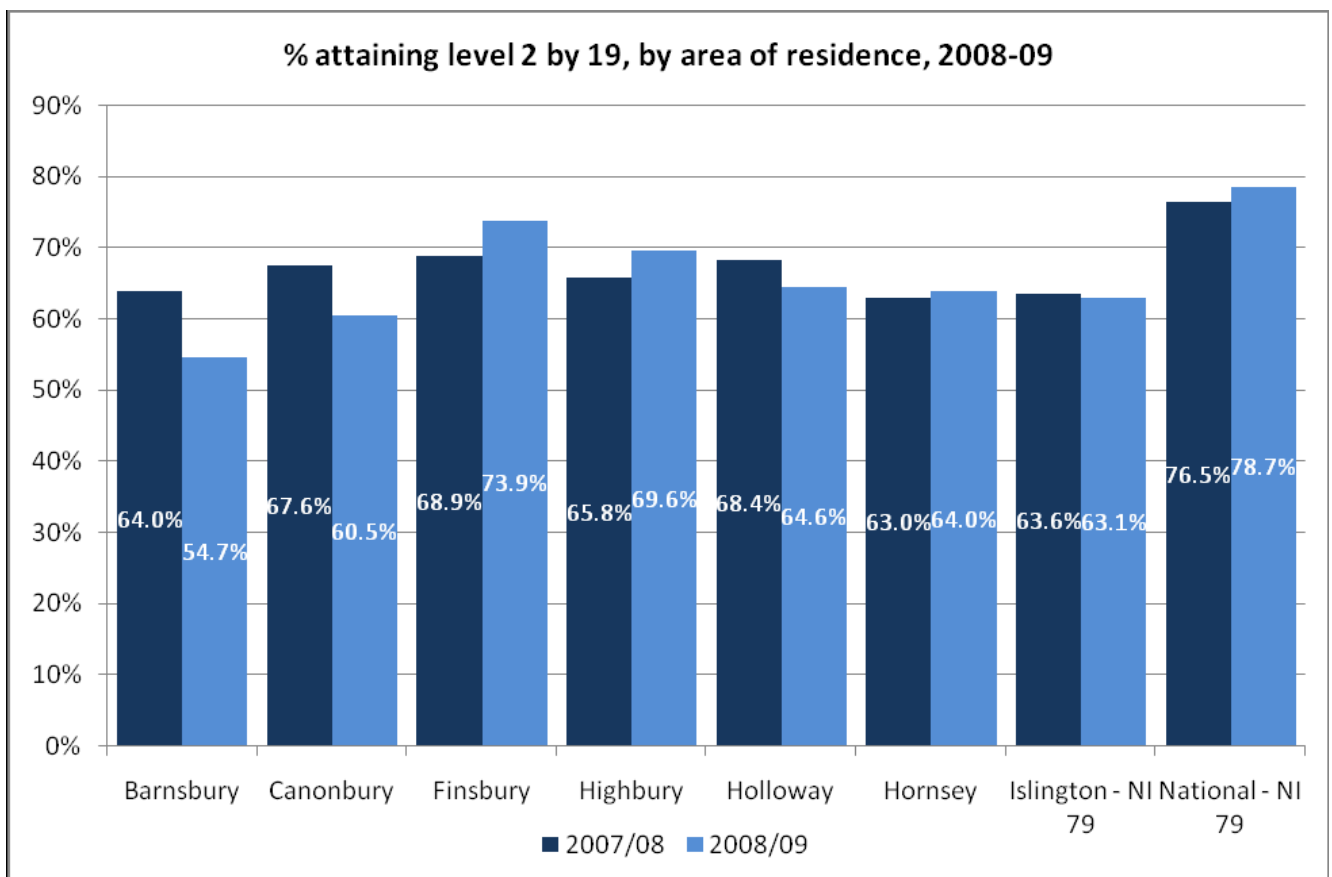

Secondary School – GCSEs

NB: The final results for 2010 are now available and reflect the provisional results shown.

Post secondary – Age 19

Crime

This section reflects the current crime levels and trends in the ward, through the use of a number of tables and graphs.

Firstly, rolling crime totals for offence categories over a two year period have been displayed. This table is segregated into six month sections and subsequently colour coded according to comparative performance of the previous period.

Red: increase in total

Yellow: no increase or decrease in the total

Green: a decrease in the total

The ward comparison graph shows the ranking for all wards based on the total of all crimes in each ward.

The ward's crime levels for offence categories have been included and subsequently ranked against the other 15 wards, to allow a greater understanding of how each ward compares on the borough. A ranking of 1 (**green**) signifies the ward has the lowest offence levels of that particular crime type on the borough, conversely, a ranking of 16 (**red**) denotes the ward with the highest.

At the end of this section are a series of graphs showing how offence levels of the main crime types have varied over the last 34 months (April 2008 to January 2011) and a trend line has been applied for easy visual representation.

Using the trend and ranking analysis described above, the crime areas showing encouraging performance and those of concern have been raised for appropriate consideration of action. It should be noted that the areas highlighted are based on the recent trend and ranking alone and take no account of any external influences that may have impacted on these crime figures. Further analysis will need to be conducted to explore any causation factors before any action plans are devised.

The **purpose** of highlighting crime areas performing well and those requiring attention is to aid the ward panel in selecting their priorities for the forthcoming period. The ward profile will be updated every 6 months with the next publication date being September 2011.

HEALTH & WELLBEING

Caledonian

May 2011

Life expectancy

Shorter lives and preventable deaths

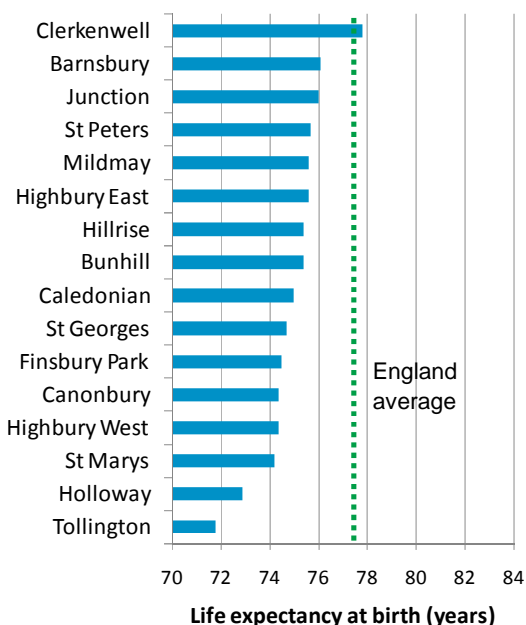

Men and women in Islington live shorter lives than the England average²⁰⁰⁷⁻⁰⁹. While it is improving, men in Islington still have the shortest life expectancy in London.

There are also marked inequalities in life expectancy: the poorest in Islington will live for 6.5 (men) and 4.1 (women) less years than the richest²⁰⁰⁵⁻⁰⁹.

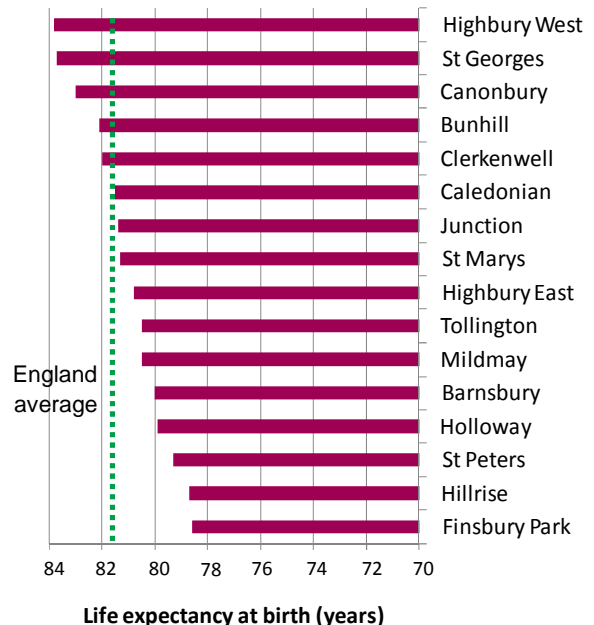

Unlike other deprived areas in London this inequalities gap has not closed over time.

Men 2004-08

Women

On average, **72** Caledonian residents die each year²⁰⁰⁷⁻⁰⁹. **45%** of these deaths are in residents aged under 75 years and are considered to be preventable. Ways in which deaths can be prevented include reducing levels of smoking, obesity and alcohol intake, increasing levels of physical activity and healthy eating, as well as encouraging people to go for cancer screening, to have the winter 'flu vaccination, and to go for an NHS Health Check to assess their risk of getting heart disease. In the longer term, deaths will be prevented by reducing poverty across the borough.

This ward profile has been produced by Islington's public health intelligence team. For more information contact publichealth.intelligence@islingtonpct.nhs.uk or call 0207 527 1258.

Smoking

Tackling one of the biggest threats to public health

Smoking causes lung cancer, chronic obstructive pulmonary disease (COPD), and heart disease. These are the big killers and the major causes of ill-health in Caledonian.

Smoking also substantially contributes to health inequalities as poorer people tend to smoke more and so will disproportionately suffer from ill-health and die younger.

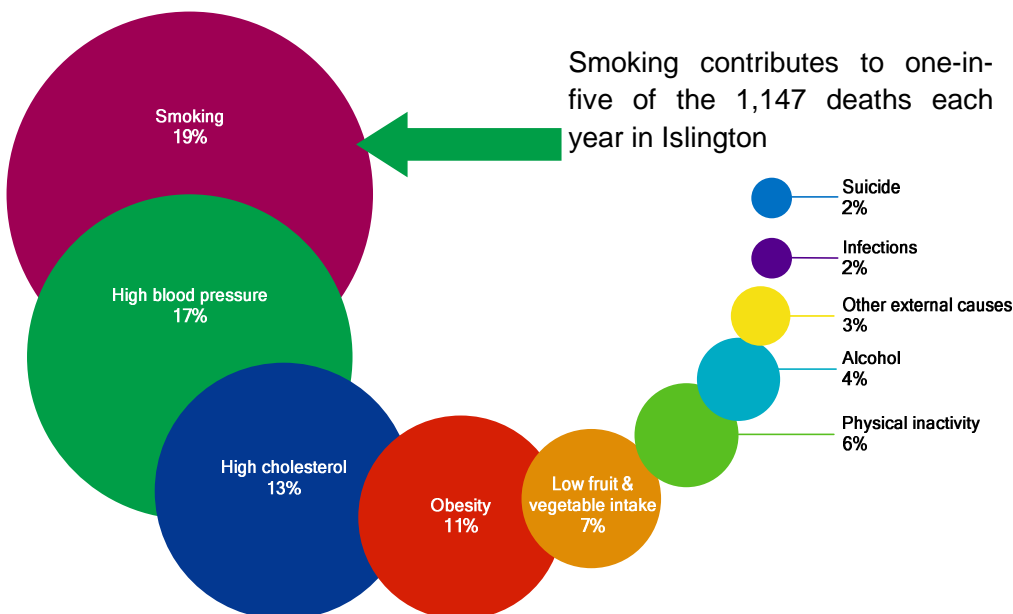

How many Islington adults smoke?²⁰⁰⁶⁻⁰⁸

3,397
smokers in
Caledonian²⁰¹¹

Smoking prevalence was significantly worse in Islington than England.

Risk factors contributing to deaths in Islington²⁰⁰⁶⁻⁰⁸

143
people from Caledonian
who achieved a
smoking quit after four
weeks^{2009/10}

14
Caledonian residents die
from lung cancer or COPD
each year²⁰⁰⁶⁻⁰⁸

18
Caledonian residents die
from heart disease each
year²⁰⁰⁶⁻⁰⁸

What can you do?

- **Encourage people to quit smoking** to improve their health, and **signpost** them to their GP, local pharmacy or the NHS Stop Smoking Service for professional support.
- **Invite the Stop Smoking Service to come along to your community events** to raise awareness of the dangers of smoking and to help people to get support to quit.
- **Pass on any information about illegal** (e.g. to under 18s) **or counterfeit cigarette sales** in your ward to the Stop Smoking Service.

Where people can get support to quit

- From their GP
- From their local pharmacy
- Through the NHS Stop Smoking Service:
www.smokefreeislington.nhs.uk or 0800 093 90 30

NHS Health Checks

Identifying those at ‘high risk’ of developing heart disease

Heart disease is one of the biggest killers in Caledonian but many of these deaths could be prevented if people were diagnosed earlier, supported to reduce their risk of illness (e.g. by stopping smoking or losing some weight), and given appropriate treatments.

“NHS Health Checks” is a programme that identifies people aged 35-74 years in Islington who are likely to develop heart disease (because they are overweight, have high blood pressure or smoke, for example). They are invited by their GP to go for a check up. People can also get checked for free in some local pharmacies and in community settings. If picked up early, help and support can be given to reduce their risks of developing heart disease.

Numbers and percentages of people with undiagnosed conditions: GP practices in Caledonian ^{2009/10}

Condition	People who are diagnosed		People who are undiagnosed		Total	
	n	%	n	%	n	%
High blood pressure	1,948	12%	1,633	10%	3,581	22%
Heart disease	372	2.2%	331	2.0%	703	4.2%
Diabetes	830	4.9%	-	-	830	4.9%

There are a large number of people who are unaware that they are living with high blood pressure because there are often no symptoms — this is why having an NHS Health Check is important.

All of those identified as being at “high risk” of developing heart disease should have been invited for an NHS Health Check by their GP practice.

177 people have had a check in a Caledonian GP practice.

An estimated **297** more people from these practices need to go for a NHS Health Check to reach all of those who are at “high risk” of heart disease.

What can you do?

- **Promote NHS Health Checks** in Islington by encouraging people aged 35-74 in your ward to have a Health Check.
- Help **publicise NHS Health Checks** by having a Health Check yourself in a local pharmacy or health community check event.
- **Invite the NHS Health Checks team to come along to your community events** to offer free checks to your local residents aged 35-74.

Where to go for a free NHS Health Check

- GP practice
- Carters Chemist
- Other community venues such as supermarkets — for upcoming venues in your area, see contact below.

Mental Health

Promoting positive mental health and wellbeing

Mental ill health is very common, affecting about one-in-six adults and one-in-ten children and young people. Islington has much higher levels of mental ill health than elsewhere because the borough has relatively more high-need groups, including younger and middle-aged adults. Recent increases in unemployment and financial hardship will increase levels of stress and mental ill health in the community. This is why promoting positive mental health and wellbeing is so important at this time.

One intervention which can help those with anxiety and depression is psychological therapy: people can talk through their problems and seek solutions with a trained professional. There are also borough-wide initiatives to reduce the stigma and discrimination associated with mental health problems and to improve understanding of the different conditions and what to do in a crisis.

Accessing psychological therapies, by ward ^{2009/10}

30,500

people registered with Islington GPs are likely to be experiencing anxiety or depression now. ²⁰¹⁰

2,585

people at GP practices in Caledonian are likely to have anxiety or depression. ^{2009/10}

130

people accessed psychological therapies in Caledonian. ^{2009/10}
This was similar to the rate of access in other Islington wards.

1,154

people who live or work in Islington

have attended Mental Health First Aid training to learn more about mental health problems.

120

people across Islington are promoting

mental health wellbeing by being a Mental Health Champion.

What can you do?

- Learn how to recognise the symptoms of mental health problems and how to deal with them — attend free **Mental Health First Aid Training** and encourage others to attend too.
- Sign up as a **Mental Health Champion** and promote mental health wellbeing among your local community.
- Support the **Time to Change campaign** and promote anti-stigma messages.

Where people can get support

- For information about conditions, symptoms, treatment options and how to get help in Islington: <http://www.islington.nhs.uk/icope/>
- From their GP
- Call 0303 123 100 to see a trained professional for support for anxiety or depression

Worklessness

Overall 'out of work' benefit claimants

This claimant group comprises the following:

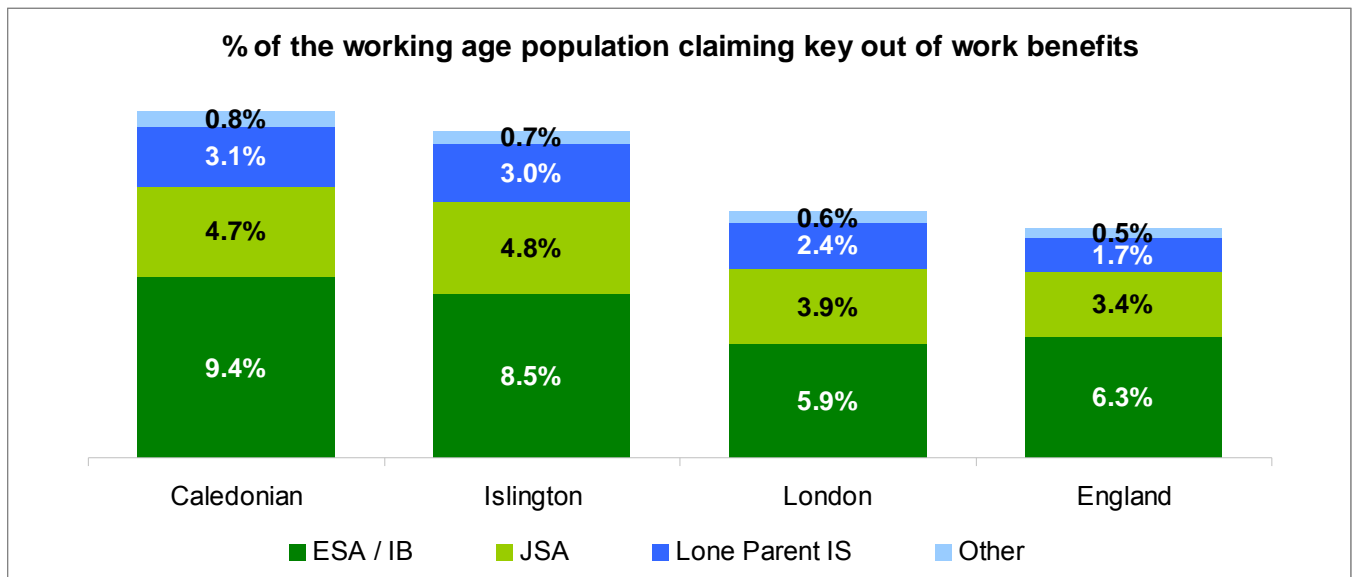

- Jobseekers Allowance (JSA)
- Incapacity Benefit (IB)
- Employment and Support Allowance (ESA)
- Lone Parent Income Support (IS)
- Other income-related benefits

The charts below show first the total number and then the proportion (%) of the working age population claiming out of work benefits (NOMIS, August 2011):

Area	% claiming out of work benefits
Caledonian	18% 1% more than Islington
Islington	17%
London	12.7%
England	12%

The following chart shows how the overall out of work benefit claimant group (shown above) breaks down by benefit type by ward, borough, London and England. Each 'stack' represents the overall proportion of working age residents claiming out of work benefits (NOMIS, August 2010):

As the chart above shows, ESA/IB claimants constitute the largest group of workless benefit claimants. This group presents particular challenges in terms of long-term worklessness: the majority of Islington IB claimants have been claiming for over five years – around 7,000 of the total of around 12,000 (August 2010). The Islington count has remained fairly steady at between 11,000 and 13,000 (8.5-9.5% of the working age population) over the last 10 years.

The chart below shows the duration of Caledonian ESA/IB claimants (NOMIS, August 2010):

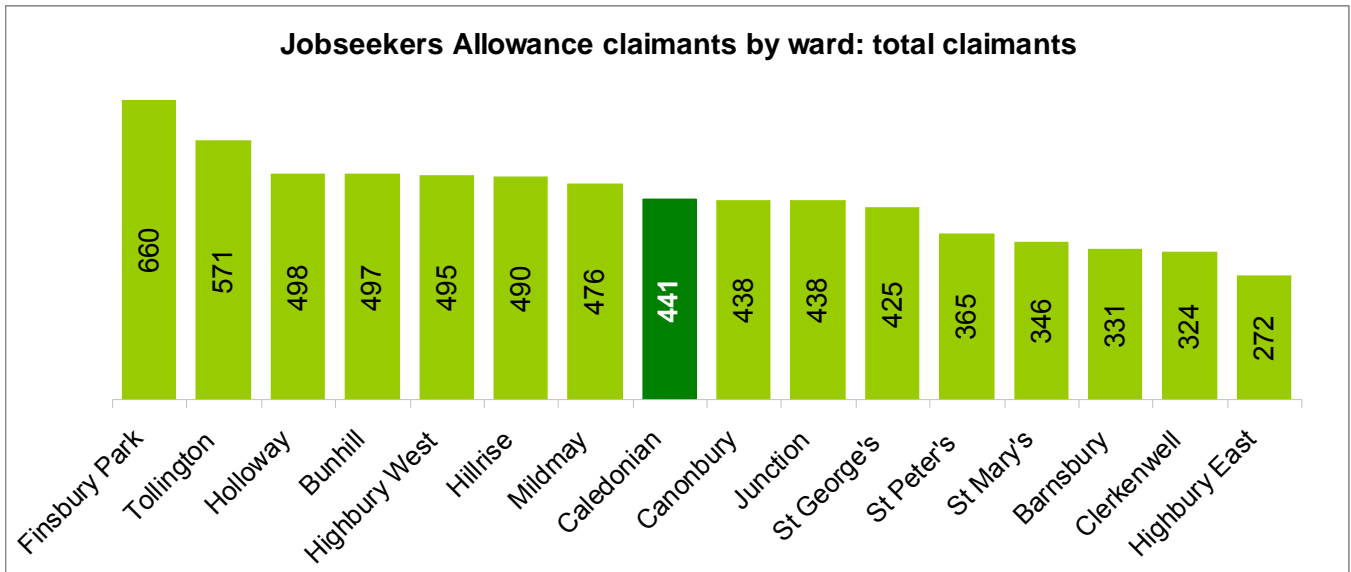

Jobseekers Allowance

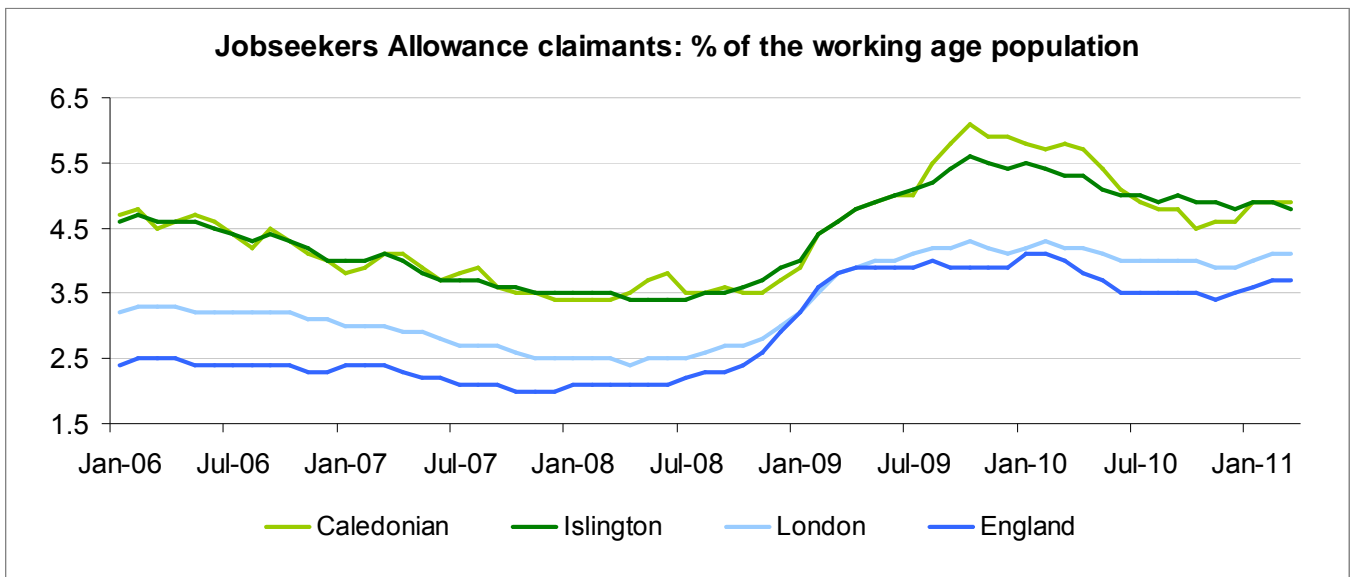

Within the out of work group, Jobseekers Allowance is the claimant count which most closely tracks 'unemployment' (i.e. those not in work but available for/looking for work) – although it isn't quite as high as unemployment, which includes workless people not claiming benefits.

The JSA count is also more up-to-date than either official unemployment figures or those available for the overall group above, so is helpful as a guide to short-term trends in the local labour market.

The following shows the JSA claimant count by ward (NOMIS, March 2011):

The following shows the trend in the proportion (%) of the working age population claiming JSA since January 2006 by ward, Islington, London and England (NOMIS, March 2011):
